2010 Total Species:	356				
				Note: This view of the comprehensive 2010 bird sightings for Maryland is for fun and should not be considered 100% accurate. All available sources will be monitored for up-to-date information, but expect a several day delay. eBird also features an excellent Arrival date feature, but this document will poll additional sources.	
				Note: Species listed as Reviewable by MD/DCRC are counted in the total, but inclusion in this document does not serve as validation for such reports. Those decisions are made by said committee.
